

# COMPOSTABLE BAGS

Drop off at Xtreme Zero Waste to compost

25% plant starch

Combined with biodegradable co-polyester

BioPak's 100% compostable plastic bags are made using Ecopond, a starch-based bioplastic that is certified compostable to Australian standards AS4736. They can be home and commercially composted.

Visual of Bioplastic Bag disintegration under EN 13432 standard testing conditions:

## What is compostable and biodegradable plastic?

Compostable plastics are capable of undergoing biological decomposition in a compost environment, the material breaks down to carbon dioxide, water, inorganic compounds and biomass, at a rate consistent with known compostable materials such as cellulose; leaving no toxic residue.
